

Al Etihad Gold and Silver Refinery

Brings to you excellent quality with trust

Al Etihad Gold, established on 2009, is a new Gold and Silver refinery in the Middle East and it clearly become one of the largest and fastest growing Gold & Silver refinery in the region particularly in United Arab Emirates.

Al Etihad Gold is founded by Khalaf Family, a reputable family from Bahrain, whom is very famous in gold business and has the biggest jewellery factory in Manama Bahrain since 1967.

Al Etihad Gold successfully surpassed its first phase as Gold & Silver refinery in a very short span of time and is amazingly climbing to its success. Now already on its second phase of development and still moving forward, it has achieved major accomplishments.

In middle of 2011, Al Etihad Gold Refinery DMCC is established. The new born refinery will rise soon on its own area in DMCC Freezone. The factory will be furnished with state of the art equipments and machineries combined with highly committed workforce and expert management will create a significant breakthrough in the refining industry

in the world. All business activities of Al Etihad Gold will be shifted to this modern refinery to be operational within 2014. Its sophisticated design and increased refining capacity will accommodate all its clients' requirements.

On the upcoming third phase, Al Etihad Gold will be more concentrated to new products and other value added products . . . etc, which is inspired by the same strategy of Dubai City of Gold development with all regards to **Sheikh Mohammed Bin Rashid Al Maktoum**, who made the Arabs or even foreigners/expatriates working in Dubai to always think as being the first rank in the world. Al Etihad Gold has a strong drive to have its share of achievement and be a part and contribute to that development.

Al Etihad Gold Management System, Due Diligence System and Working Procedures & Specifications from day one are identical to International Standards. On June 2011 it is accredited by ISO9001:2008 for Quality Management System. Not only that, its KYC and AML (Anti Money Laundering) procedures are based on DMCC (Dubai Multi Commodities Center) recommendations.

Furthermore, everything related to environment is approved by the Dubai Municipality.

“When it comes to accurate, best quality and excellent client’s satisfaction for Gold and Silver refining Al Etihad Gold is the name you can (trust) count on.”

SERVICES
